🙋‍♀️ About Me

Went from balance sheets to bar charts, and honestly, I'm not mad about it. B.Com by degree, data nerd by choice — Excel is basically my love language. Traded "
counting things, solving mysteries hidden in datasets, and turning raw numbers into decisions that actually matter. From commerce classrooms to data dashboa

I'm currently a 4th-year B.Com (Programme) student at **Jesus and Mary College, Delhi University**, transitioning from a commerce background into the world of

📚 Currently Learning

🐍 Python
🗄️ SQL
📊 Power BI
📈 Statistics
🤖 Machine Learning Fundamentals

🛠️ Tools & Tech

Data Analysis: Python, SQL, Excel **Visualization:** Power BI, Excel **Foundations:** Statistics

💼 Projects / Case Studies

📊 Market Research Project — MSME Course (Excel)

Business Problem: Understand how rent and shop area vary across different markets and malls to help businesses make informed leasing decisions.
Approach: Collected and analyzed real-world data on rent and shop area, identified patterns, and built predictive estimates.
Tool Used: Microsoft Excel
